

Digital Economy Strategies

The *Digital Economy Strategies* program will provide a comprehensive overview of macroeconomic challenges and forces, highlighting their impact on worldwide organizations' digital plans and investments. This will include real-time analyses of impactful events that could be potential drivers or disruptors of the ICT market, a regular update on ICT spending trends across regions, in-depth insights on digital regulations and policies, and key countries' digital strategies and next-horizon plans. It will equip customers with the tools to react quicker to disruptions and seize opportunities faster by updating them with rigorous qualitative analyses based on IDC's global research and surveys (e.g., IDC's *Future Enterprise Resiliency and Spending Survey*) on a timely basis.

MARKETS AND SUBJECTS ANALYZED

This IDC worldwide *Digital Economy Strategies* CIS provides a comprehensive view of the increasingly intertwined connection between the macroeconomic and the digital world. It highlights how macroeconomic factors and forces impact the digital landscape and vice versa — how emerging digital trends impact more and more worldwide economies, becoming, in turn, macroeconomic winds of change themselves.

The program pivots around five pillars of research:

- **Digital market disruptors and drivers:** Providing a timely, reactive view to unexpected macroeconomic events and their impact on technology markets
 - **Big macro themes:** Offering a holistic picture of the key big themes shaping the evolution of the digital landscape
 - **The ICT spending pulse:** Serving as a regular update on worldwide ICT spending, qualitatively analyzing key dynamics behind that and comparing it with economic indicators
 - **Regulations and policies:** Providing an overview of key digital regulations and policies across regions and industries
 - **Country digital programs and strategies:** Analyzing key country digital programs and strategies, highlighting their digital initiatives and the underlying government stimulus
-
